STATION ID: 35F050
STATION NAME: Pataha Creek near Mouth
WATER YEAR: 2007
AUTHOR: Mitch Wallace

Introduction

Watershed Description

Pataha Creek is a tributary of the Tucannon River. The confluence is approximately 1 mile downstream from the station. Pataha Creek runs generally northward from its headwaters in the northern Blue Mountains and then turns westward near the communities of Pataha and Pomeroy, where it drains agricultural lands.

Gage Location

The station is located at the Highway 261 crossing of Pataha Creek. It is located within the right-of-way of Highway 261 on the left side, downstream of the highway crossing.

Discharge

Table 2. Discharge Statistics.

Mean Annual Discharge (cfs)	13
Median Annual Discharge (cfs)	9.2
Maximum Daily Mean Discharge (cfs)	65
Minimum Daily Mean Discharge (cfs)	0.70
Maximum Instantaneous Discharge (cfs)	98
Minimum Instantaneous Discharge (cfs)	0.70
Discharge Equaled or Exceeded 10 % of Recorded Time (cfs)	36
Discharge Equaled or Exceeded 90 % of Recorded Time (cfs)	1.12
Number of Days Discharge is Greater Than Range of Ratings	0
Number of Days Discharge is Less Than Range of Ratings	93

Note: Statistics displayed in Table 2 may not include values in which the predicted discharge exceeds the range of ratings.

Narrative

The days in which discharge is less than range of ratings indicates that at least one data point during the day was less than half of the lowest measured discharge. Peak flow occurred on January 3, 2007.

Weighted Rating Error (% of discharge)	11.5
Total Potential Error (% of discharge)	18.4

Narrative

Rating 22 was created to correct for a change in control. This change was caused by the removal of downstream debris.

Stage Record

Minimum Recorded Stage (feet)	3.07
Maximum Recorded Stage (feet)	7.05
Range of Recorded Stage (feet)	3.98
Number of Un-Reported Days	10
Number of Days Qualified as Estimates	12
Number of Days Qualified as Unreliable Estimates	0

Narrative

The unreported days were due to a suspected leak in the o-line. This can occur at very low air temperatures.

Activities Completed

Replaced ferrule on o-line to minimize o-line leakage at low air temperatures.
